

LETTER OF RECOMMENDATION

It gives me a sense of fruition in recommending Bondalapati Bindu Priya whom I have known for the past one and a half year, in my capacity as an Associate Professor. I have handled core theory, which includes Data Base Management Systems (theory and lab) and MINI Project. This gave me enough opportunity to interact with her and to assess her potential

Her excellent academic record along with her dedication and communication skills make me rate her amongst the top 3% of the students I have taught in my profession. You have my assurance that Bindu Priya would be best suited for education into the postgraduate program of your university and would pursue with interest and motivation.

In my view, I have found her to be an outstanding student who is highly responsible and intelligent. The abstract concepts in the subjects I handle require intense concentration and utmost dedication. She not only understood them thoroughly, but also was to demonstrate superior problem-solving skills. She is a student who works hard with conviction. She has the basic concepts ingrained in her and can understand concepts at ease. She is a disciplined student who bears a pleasant disposition. A resourceful, dynamic, and painstaking individual, she has consistently produced good results in her assignments.

As an intelligent student, she was always ahead of the rest during practical. She had the capability to work effectively and efficiently in a group as alone. Often, I would find her providing assistance to her batch. Drawn by her inquisitive nature she would spend her spare time looking at the scientific journals and keep herself updated on the latest trends in the field of communication. To plan to work and then execute work according to the plan was her major attribute. She had her priorities set and worked hard to achieve them. Quality was her forte as the assignments she submitted substantiated them.

I have found her to be enthusiastic and eager to receive more information from me. Her command over the English language is fairly comfortable. These achievements reflect her indomitable spirit to learn new things and thus make her an excellent research assistant. She has played a key role in arranging, coordinating guest lectures, seminars, and department fests.

Bearing her impressive background and caliber in mind I vouch for the fact that she will be an ideal candidate for this postgraduate program in your esteemed university. It would certainly be a prudent decision to enlist her as a student in your department.

Dr.G.Anuradha.M.Tech.,Ph.D.
Associate Professor,
Department of Computer Science and Engineering,
VR Siddhartha Engineering College.
